DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Dogliani.

Re claim 1, Dogliani discloses a vehicle open roof apparatus which permits a roof covering a top of a passenger compartment to be stored in a storage compartment (shown in hidden lines in figure 1) at a vehicle rear portion, the open roof apparatus comprising at least one link mechanism (7) swingably mounted to a vehicle body of the vehicle to permit the roof to move between an extended position in which the roof is extended over the top of the vehicle and a stored position in which the roof is stored in the storage compartment, and at least one link lock mechanism (8, 12) for fastening a swinging distal end portion of the link mechanism to a rear end portion of the vehicle body when the roof is moved into the stored position.

Re claim 2, the link mechanism and the link lock mechanism are provided at either side of the vehicle body (column 2, lines 47-53).

Art Unit: 3612

Re claim 3, the link lock mechanism comprises a striker (8) provided at the swinging distal end portion of the link mechanism and a latch mechanism (12) provided at the rear end portion of the vehicle body for locking and unlocking the striker.

Allowable Subject Matter

4. Claim 4 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kleemann et al., Shaw et al., Mattila, and Saunders disclose lock mechanisms for vehicle tops.
